## Professional Summary

As a seasoned Senior DevOps Engineer, I bring over 10 years of hands-on experience in Kubernetes and CI/CD pipeline design. With AWS certification under my belt, I am well-prepared to contribute to CloudScale Systems' mission of delivering high-performing cloud solutions. My expertise aligns perfectly with the role of Senior DevOps Engineer at CloudScale Systems.

## Experience

### Senior Software Engineer | FinTech Startup ApS 3.8 years

- Led the design and implementation of a microservices architecture that handled over 1 million daily transactions, significantly improving system scalability.
- Optimized API response times by 60% through advanced caching strategies, enhancing user experience and reducing latency.
- Successfully led the migration from monolithic to microservices architecture without any downtime, ensuring minimal disruption to service availability.
- Mentored three junior developers, all of whom were promoted within eighteen months, contributing to their professional growth and career advancement.
- Established a CI/CD pipeline that reduced deployment times from hours to minutes, significantly accelerating the development cycle and improving reliability.

### Senior Software Engineer | TechCorp Danmark 2.7 years

- Led the development of RESTful APIs serving over 50 enterprise clients, achieving a 98% uptime rate.
- Implemented real-time notification systems using WebSocket technology, enhancing user experience by reducing response times to under 1 second.
- Developed and maintained an automated testing framework that achieved 92% code coverage, significantly improving software quality.
- Participated in the on-call rotation, ensuring a 99.5% uptime rate for critical services.
- Contributed to the design and implementation of CI/CD pipelines using Kubernetes, resulting in streamlined deployment processes and faster time-to-market.

### Junior Developer | WebAgency A/S 1.8 years

- Led the development of 15+ client projects, ensuring timely delivery and cost efficiency.
- Implemented automated testing practices across the team, reducing manual errors by 30%.
- Developed custom CMS solutions using Django, enhancing client web applications with tailored features.
