Professional Summary

As a Senior Software Engineer with 4+ years of full stack development experience, I specialize in leveraging React for front-end development and TypeScript for robust backend solutions. My proficiency in Node.js allows me to craft scalable and efficient server-side applications. With a strong alignment towards TechVentures Inc.'s mission, I am eager to bring my expertise as a Full Stack Developer to contribute to innovative projects.

Experience

Senior Full Stack Engineer | FinTech Startup ApS 3.8 years

- Led the design and implementation of a microservices architecture that handled over 1 million daily transactions, significantly improving system scalability.
- Optimized API response times by 60% through advanced caching strategies, enhancing user experience and reducing load on backend servers.
- Successfully led the migration from a monolithic to a microservices-based architecture without any downtime, ensuring minimal disruption to service availability.
- Mentored three junior developers, resulting in all being promoted within eighteen months, contributing to their professional growth and retention.
- Established and maintained an efficient CI/CD pipeline that reduced deployment times from hours to minutes, accelerating the release cycle and improving overall system reliability.

Full Stack Developer | TechCorp Danmark 2.7 years

- Developed and maintained RESTful APIs serving over 50 enterprise clients, achieving a 98% uptime rate.
- Implemented real-time notifications using WebSocket technology, enhancing user experience by reducing response times to under 1 second.
- Created an automated testing framework that achieved 92% code coverage, significantly improving the reliability of our backend services.
- Participated in on-call rotation, ensuring a 99.5% uptime rate for critical systems.
- Contributed to the development and deployment of microservices using Node.js and Docker, optimizing application performance by up to 30%.

Full Stack Developer | WebAgency A/S 1.8 years

- Led the development of 15+ client projects, ensuring timely delivery and cost efficiency.
- Implemented automated testing to enhance project quality and reduce errors by 20%
- Developed custom CMS solutions using React for improved user experience.
